Laboratory & Hospital

W.W. Cannon and Rousseau understand how valuable your space is, and that in order to provide optimum care and service, items need to be organized and clearly identified for fast retrieval.

For hospital, laboratory and pharmaceutical environments, Rousseau has a solution that can be tailored to virtually any storage need your facility may have. The Rousseau system is advantageous due to the **flexibility of the storage products**; they can be reconfigured and adjusted as your workplace evolves and your requirements change.

For storage of specialized and **fragile items, or regular bulk storage**, Rousseau offers flexible products of durable construction. They respond to storage and organizational requirements in hospital and laboratory departments such as :

- **Hospital Central Supply Rooms / Parts Departments:** Rousseau products improve inventory efficiency while storing more in a small space. Items ranging from surgical kits to office and cafeteria supplies can all be stored with the Rousseau system. When you combine Rousseau steel shelving with lockable glass doors, you protect your valuable and fragile items from theft, while also keeping your inventory free of dust and dirt.
- **Maintenance:** Rousseau has a functional solution for your maintenance technician that facilitates moving items from where they are stored, to where they are needed.
- **Office and Archival Storage:** For office needs such as filing, storage of office supplies, patient and client record storage and archiving, Rousseau offers a line of versatile and attractively designed storage products that are equipped with a wide range of accessories.
