## OVERVIEW

Akon supplies industrial warehouse divider curtains for warehouses of all sizes and shapes. We can supply standard vinyl warehouse curtain dividers to divide up space or provide insulated curtain walls which are ideal for creating temperature zones. Akon can provide expert advice and solutions which will result in a successful smooth installation. In addition to educating you and your staff on the benefits and limitations of these large warehouse divider curtains, you will receive one of the most economical curtains on the market.

## IDEAL APPLICATIONS

- Dividing up manufacturing space
- Temperature control
- Dust and odor control
- Paint or wash overspray control
- Smoke containment
- Humidity containment
- Separating tenants

## CURTAIN MATERIAL

- 13oz, 18oz and 20mil Industrial Grade Vinyls
- Meets NFPA 701 & California Fire Codes
- Reinforced with Polyester Scrim For Strength
- Easy to wipe clean
- Resistant to most chemicals
- High tensile strength thread for durability
- Double stitched hems for added reinforcement on edges

## BENEFITS

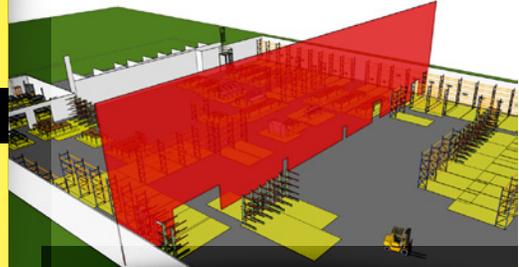

- Less expensive to rigid walls like drywall and panels
- Quick to install and take down and move if necessary
- Five year warranty on the curtains
- Create a clean looking work environment
- Reduce heating and cooling bills
- Modular in design for future use in other locations
- Great for cold storage warehouses and distribution centers

## CUSTOM CURTAIN DESIGN

Each curtain wall is custom designed to your exact specifications. You can choose your own colors, width, height, vision panels and other many other features. In addition to standard materials you can also choose insulated garage curtains to control temperatures for your work areas.

## MODULAR IN DESIGN

The AKON industrial curtain walls can be taken down and used in other areas of your facility if needed. This can be done quickly and efficiently. If you need to reconfigure the curtain wall system we can provide you with additional snap together tracks and Velcro to attach additional curtains to your existing ones. That is lean manufacturing and a nice reduction in your company expenses.

## TYPICAL CURTAIN OPTIONS

Floor Sweep

Seal Velcro

Curtain Color

Clear Vision Panel

Anchor Straps

Chain Weight pocket

Curtain Track

Seal Magnets

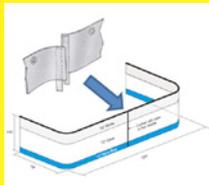

Roll-up Doors

## CURTAIN ENTRY OPTIONS

### VELCRO OR MAGNET SPLIT

#### Description:

The most economical entry option is a simple split in the curtain. This allows people and product to slip through without much hassle. If the curtain has curtain track the curtain can then be rolled open as well. The split does not even have to have the Velcro.

### STRIP DOOR – FREE-STANDING

#### Description:

A 3" x 3" frame with PVC strips can be used for access. The frame has 12" x 12" base plates on both sides that anchor to the floor. The main curtain is then Velcro attached or bolted to the outside perimeter of this steel frame.

### STRIP DOOR – SEWN IN

#### Description:

The strip curtain can be sewn into the curtain for greater flexibility of moving the curtain out of the way should the need arise. Note Max size is 10" x 10" and material must be 18oz or thicker

### FREE-STANDING CURTAIN DOOR

#### Description:

A free-standing frame can also be used to supply a side to side curtain on rail which can be pushed out of the way. This can also be supported from above with chain, cables, or threaded rod drops. The curtain door simply rolls on curtain track for easy movement.

### POWER ROLL UP DOOR

#### Description:

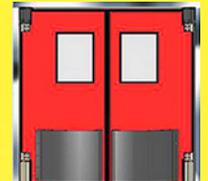

Supported with a free-standing frame the power roll up doors can be opened and closed via remote from a fork lift. Door styles and prices vary based on frequency of opening and closing, speed requirements and size.

### IMPACT SWINGING DOOR

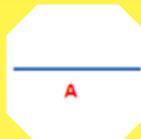

#### Description:

A free-standing industrial swinging door can also be provided for access. Also known as impact doors, these heavy duty doors can take a lot of abuse from carts, fork lifts or heavy foot traffic. The doors freely swing both forward and backwards like restaurant kitchen doors.

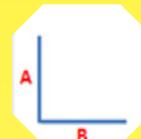

## COMMON CURTAIN CONFIGURATIONS

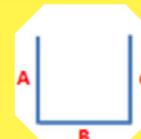

Our curtains can be laid out in several different configurations. They can be single sided, double sided, triple sided or four sided to create complete enclosures. You simply inform AKON on your desired design and we will have it fabricated exactly as you need it.

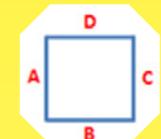

Straight

2-sided

3-sided

4-sided

## EASY GLIDE CURTAIN TRACK

Your curtains can be suspended using many different mounting styles, as shown here. The 16 gauge galvanized steel is resilient to water and rust and comes with a lifetime warranty.

### Mounting Options

1. Ceiling Mount
2. Wall Mount
3. Chain or Cable Mount
4. Threaded Rod Mount
5. I-Beam Mount
6. Aluminum Angle / Static Mount
